MERINO WEAR AND SOCKS

MERINO WEAR AND SOCKS

ABOUT US

LASTING SPORT

| EN

We are a proud European manufacturer of specialized clothing and clothing accessories for sports, leisure and various industrial operations.

LASTING SPORT Ltd. is among the most leading and respected of Czech companies with almost 30 years of tradition. Its success in the at home and abroad is associated with the production of functional underwear and socks made of MERINO wool and other materials. Lasting was founded in 1991 in the Czech Republic. With 60 employees, it is one of the most traditional European manufacturers of specialized clothing for sports, outdoor and work.

LASTING initially engaged in the production of socks and functional underwear from technical materials. Fifteen years ago it began focusing on manufacturing functional clothing and socks made of MERINO Wool 16.5 microns. This very fine wool does not scratch and is pleasant to the touch. Our products have received many awards for high quality and functionality. We currently have over 1,000 different products in our assortment and annually produce close to 350,000 pairs of socks and 100,000 pieces of functional clothing in our own factory near Karlovy Vary. This represents a knitting consumption of about 25,000 Kg of merino wool and 25,000 Kg of additional materials per year.

We care about the environment. We are a modern and progressive industrial company striving to reduce our carbon footprint. We try to minimize or eliminate any negative impacts of our production. We restrict the use of plastics in packaging materials. Our own photovoltaic power plant, placed on the roof of our building produces 35% of the energy we use , in addition to the other mechanisms of conservation we incorporate.

Our woolen yarn comes from certified farms in Australia that guarantee the ethical treatment of animals and do not practice mulesing.

| CZ

Jsme hrdým evropským výrobcem specializovaného oblečení a oděvních doplňků pro sport, volný čas a různé průmyslové provozy.

LASTING SPORT s.r.o., se řadí mezi české (evropské) výrobce s více než 30-ti letou tradicí. Značka a její úspěch je ve světě spojován s výrobou a prodejem funkčního prádla a ponožek z MERINO vlny a technických materiálů.

Vznikla v roce 1991 v České republice a dnes má více než 60 zaměstnanců.

Zpočátku byla výroba zaměřena na ponožky a funkční prádlo z technických materiálů. Na přelomu let 2000 a 2001 jsme začali vytvářet vlastní program výroby prádla a ponožek ze Super fine MERINO VLNY o mimořádné jemnosti 16.5 mikronů. Neustále se snažíme přinášet nové trendy v okruhu funkčního, technického a vlněného prádla a ponožkách pro sport i běžné použití.

Výrobky značky LASTING získaly mnoho uznání vysoké kvality a funkčnosti. Nyní máme v sortimentu více než 1000 různých produktů a ročně vyrábíme ve vlastní továrně u Karlových Varů až 350000 párů ponožek a 100000 ks prádla. Pro představu je spotřeba na pletení asi 25000 Kg merino vlny a 25000 Kg ostatních technických materiálů za rok.

Nejsme lhostejní k přírodě. Patříme mezi moderní průmyslové podniky, a o to více se snažíme, abychom případné negativní dopady naší výroby předem eliminovali či zcela vyloučili. Omezujeme používání plastů v obalových materiálech. 35% energie použité na výrobu našich produktů pochází z vlastní fotovoltaiické elektrárny na střeších našeho objektu a z jiných obnovitelných zdrojů.

Vlněná příze pochází z certifikovaných farem z Austrálie, které garantují etické zacházení se zvířaty a neprovádí mulesing.

MERINO WOOL O MERINO VLNĚ

| EN

MAIN REASONS FOR CHOOSING THE LASTING WOOLEN UNDERWEAR:

- 100% natural
- High - grade permeability
- Maximum comfort because of excellent moisture elimination.
- The fine Merino wool causes no scratching or itching.
- Excellent thermo isolation owing to many tiny air bags between the fibers.
- Flat seams for a comfortable feeling.
- Natural wool fiber is ideal for physical activity.

Common wool, which has a fiber diameter of 30 microns, is uncomfortable for most people. The diameter of the fiber is directly proportional to the level of itching that you feel. Underwear made from merino wool with a fiber diameter of 18 – 22 microns is more comfortable than underwear made from regular wool, but sometimes it still may itch.

Our clothing is made from carefully selected **SUPER FINE MERINO WOOL** with a fiber diameter of 16 microns. This is the finest merino wool that breeding farms produce at the moment. Choose the best from nature and enjoy the great properties of wool fibers without the itching.

| CZ

HLAVNÍ DŮVODY PROČ ZVOLIT VLNĚNÉ PRÁDLO LASTING:

- 100% přírodní materiál
- Vysoká prodyšnost
- Maximální komfort díky vynikajícímu odvodu vlhkosti.
- Jemná merino vlna neškrábe nesvědčí.
- Skvělá tepelná izolace díky mnoha drobným vzduchovým kapsám mezi vlákny.
- Ploché švy pro vysoký komfort.
- Perfektní zpracování úpletů a vysoká elasticita pro ideální pohyblivost.

Běžná vlna o průměru vlákna 30 mikronů je pro většinu lidí na dotek nepříjemná. Průměr vlákna je přímo úměrný pocitu škrábání či kousání vlny na vaší kůži. Prádlo z Merino vlny o průměru vlákna 18 – 22 mikronů je příjemnější než prádlo z běžné vlny, ale občas cítíte, že Vás něco kouše.

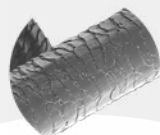

Prádlo je vyrobené z pečlivě vybrané **SUPER FINE MERINO VLNY** o průměru vlákna pouhých 16 mikronů. To je nejjemnější merino vlna, kterou chovatelské farmy v současné chvíli produkují. Vyberte si i Vy to nejlepší z naší přírody a využijte skvělých vlastností vlněných materiálů bez pocitu škrábání nebo kousání.

25 MC

Ordinary wool with a fiber diameter of 25 or more microns is unpleasant to the touch for most people.

Běžná vlna o průměru vlákna 25 a více mikronů je pro většinu lidí na dotek nepříjemná.

18 MC

clothing made of Merino wool with a fiber diameter of 18 - 22 microns is more pleasant than fabric made of ordinary wool.

Prádlo z Merino vlny o průměru vlákna 18 - 22 mikronů je příjemnější než prádlo z běžné vlny.

16 MC

16 MC is the finest merino wool that breeding farms currently produce.

16 MC je nejjemnější merino vlna, kterou chovatelské farmy v současné chvíli produkují.

WOOLCEL - 55% MERINO

EN Single jersey knit from **ultra-soft merino wool 16 microns and natural fiber Modal**. It is suitable as the first layer in warm weather. The combination of Modal and Wool provides very good breathability and sweat management, keeping you cool and providing the optimal climate. It has a pleasant silk feel for maximum comfort. Thanks to the cooling effect, it is very suitable for summer and indoor sports. The natural properties of Modal and merino wool greatly **reduce the formation of harmful bacteria**.

CZ Jednolátný úplet z **ultra jemné merino vlny 16 mikronů a přírodního vlákna Modal**. Je vhodný jako první vrstva do teplého počasí. Kombinace Modalu a vlny s velmi dobrou prodyšností a odvodem potu, chladí v létě a zajišťuje optimální klima. Příjemný hedvábný omak pro maximální komfort. Díky chladivému efektu je oblečení vhodné na letní a halové sporty. Přírodní vlastnosti Modalu a merino vlny **výrazně omezují tvorbu bakterií** způsobujících nepříjemný zápach.

ACTIVE SEAMLESS

SAFE + SKIN

| EN

1 Protection from perspiration
active layer transported increased production of sweat in the armpits from the skin. Unpleasant odors are reduced thanks to natural antibacterial merino wool during active sports.

2 Support of the abdominal muscles and hips
the places of abdomen and hips have the compression function

3 Protection from the cold
full single knitwear of wool ensures protection from the cold of the shoulders

4 Increased thermal protection together with ventilation in the spine
combination of smooth and perforated surfaces protect from the cold and ventilate in areas of increased sweating

5 Increased thermal protection in the kidney area
light reinforcement in the hips and kidneys protect from the cold

6 Minimum number of seams
T-shirt is made by seamless technology - the minimum number of seams. Stitched only on the sleeves and collar

| CZ

1 Ochrana před pocením
zvýšenou tvorbu potu v podpaží transportuje od pokožky aktivní vrstva. Díky funkci přírodní, antibakterální merino vlny, se snižuje nepříjemný zápach při aktivním sportu

2 Podpora břišních svalů a boků
oblast břicha a boků má podpůrnou kompresní funkci

3 Ochrana před chladem
ochranu před chladem v ramenou zabezpečí plný jednolící úplet z vlněné příze

4 Zvýšená tepelná ochrana společně s odvětráním v oblasti páteře
kombinace hladké a děrované plochy tvoří jak ochranu před chladem, tak odvětrávací plochu v místech zvýšeného pocení

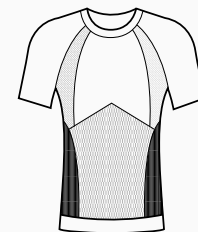

5 Zvýšená tepelná ochrana zad v oblasti ledvin
lehké zesílení v bocích a ledvinách Vás dostatečně chrání před chladem

6 Méně šitých švů
triko je vyrobeno technologií seamless - minimální počet švů. Šité pouze na rukávech a límečku.

ACTIVE SEAMLESS

SAFE + SKIN

EN Seamless luxury woolen clothes will become your favorite.

Reliably transports moisture away from the skin and natural 16-micron merino ensures perfect thermal comfort. Highly elastic material allows for easy dressing. Perfectly adapted woolen yarn that definitely does not scratch while still encircling the body. Thanks to a unique processing it perfectly fits each figure.

CZ Bezešvé vlněné luxusní prádlo, které si ihned oblíbíte. Spolehlivě odvádí pot od pokožky a přírodní 16-ti mikronové merino zabezpečí dokonalý tepelný komfort. Vysoce elastický materiál umožní snadné oblékání. Skvěle upravená vlněná příze, která zaručeně neškrábe a velmi lehce obepíná tělo. Díky unikátnímu zpracování perfektně sedí každé postavě.

EN **1 2** Protection from perspiration. Active layer transports perspiration away from the skin out.
3 Support to bend. Knitwear is adapted for easy bending arm.
4 Compression Support the abdomen and hips have the compression function thanks thermally insulated elastane and anatomically shaped areas
5 Mechanical protection formed layered part which protects the forearm and wrist from the sores

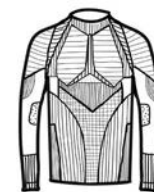

6 Reinforced protection of shoulders. Formed layered knit in combination with seamless technology as a protection zone in the entire area of the arm and protects the entire wide deltoids.
7 Increased thermal protection multiplying the plurality of air channels supports heat accumulation in part of the kidney
8 Reinforcement from physical exertion Layered knitwear is dimensionally adapted to protect the elbow parts.
9 Minimum number of seams T-shirt is made by seamless technology - the minimum number of seams. Stitched only on the sleeves and collar.

LIGHT / 180 g

97 % POLYPROPYLENE
3 % ELASTANE

EN This is a light seamless underwear designed to be used as a base layer on the body. Polypropylene micro fiber contains the permanent „SILTEX“ finish - silver ions inside the fibers, therefore it provides anti-bacterial protection. High thermal insulation is a result of the knitting of the short reverse loops on the inside of the fabric. These loops create an incredible number of air ducts, thanks to which the underwear has a high thermal insulation capability. The almost zero water absorption of polypropylene maximizes sweat transport away from the skin.

CZ Lehké bezešvé prádlo určené jako základní, spodní vrstva na tělo. Polypropylenové mikrovlákno obsahuje nevypratelnou úpravou „SILTEX“ – ionty stříbra uvnitř vláken, díky tomu poskytuje prádlo antibakteriální ochranu. Vysoká tepelně izolační schopnost díky způsobu pletení krátkých rubních smyček na vnitřní straně úpletu. Tyto smyčky vytváří neuvěřitelné množství vzduchových kanálků, díky kterým má prádlo schopnost vysoké tepelné izolace. Téměř nulová nasákavost polypropylenu maximalizuje transport potu od pokožky.

WOOLCEL 55% MERINO

EN *Light 150 g | Flat fine knitted fabric | 1. layer*
Single jersey knit from ultra-soft merino wool 16 microns and natural fiber Modal. It is suitable as the first layer in warm weather. The combination of Modal and Wool provides very good breathability and sweat management, keeping you cool and providing the optimal climate. It has a pleasant silk feel for maximum comfort. Thanks to the cooling effect, it is very suitable for summer and indoor sports. The natural properties of Modal and merino wool greatly reduce the formation of harmful bacteria.

CZ *Light 150 g | Hladký jemný úplet | 1. vrstva*
Jednolícňový úplet z ultra jemné merino vlny 16 mikronů a přírodního vlákna Modal. Je vhodný jako první vrstva do teplého počasí. Kombinace Modalu a vlny s velmi dobrou prodyšností a odvodem potu, chladí v létě a zajišťuje optimální klima. Příjemný hedvábný omak pro maximální komfort. Díky chladivému efektu je oblečení vhodné na letní a halové sporty. Přírodní vlastnosti Modalu a merino vlny výrazně omezují tvorbu bakterií způsobujících nepříjemný zápach.

MERINO LIGHT SUPERFINE

EN *Light 160 g | Flat fine knitted fabric | 1. layer*
Clothing made of this knitted fabric is designed to be worn year-round as a base layer directly on your body. In the spring and summer, it can be utilized as the only layer. This material has an excellent pleasant feel, is very permeable, comfortable and keeps you warm. Thanks to 16 micron merino wool we guarantee no itchiness. It can be utilized in almost any sport and outdoor activity.

CZ *Light 160 g | Hladký jemný úplet | 1. vrstva*
Oblečení z tohoto úpletu je vhodné celoročně jako první vrstva na tělo, případně jako jediná vrstva na jaře a v létě. Materiál vyniká příjemným omakem, prodyšností a komfortem. Udržíte uživatele v teple a suchu. Díky 16 mikronové vlně garantujeme že úplet neškrábe. Oblečení je vhodné pro všechny sporty a outdoorové aktivity.

WOOLTECH

55% MERINO

WOOLTECH - 55% MERINO

| EN Outside polyester / inside merino

Double face knit with 100 % merino wool 16 microns inside and recycled polyester - polyamide from the outside. It is suitable as a first or mid layer. Merino wool in direct contact with your skin will keep you warm and provide the optimal climate in every condition. Polyester with polyamide yarn ensures fast evaporation of moisture and increases the durability of clothes. Functional knit uvnitř merino while maintaining the benefits of merino wool.

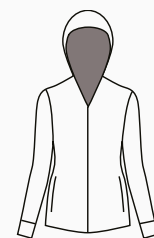

| CZ Zvenku polyester / uvnitř merino

Oboustranný úplet se 100% merino vlnou 16 mikronů uvnitř a polyester - polyamid zvenku. Vhodné jako první nebo druhá vrstva. Merino vlna v přímém kontaktu s pokožkou Vás bude hřát a zajišťovat optimální klima za každých podmínek. Polyester s polyamidovou přízí zajistí rychlý odvod potu a zvýší odolnost výrobků. Funkční úplet při zachování výhod merino vlny.

MERINO MEDIUM 230 g

| **EN** Medium 230 g | Interlock knitted fabric | 1. - 2. layer

Elastic knit from 100% merino wool 16 micron is suitable as the first or mid layer. The interlock knitting guarantees high product elasticity while keeping the benefits of the natural merino wool. The air channels in the fabric improve the insulating properties of the material and improve sweat management. Clothes made from 230 g interlock are characterized by high comfort and functionality.

| **CZ** Medium 230 g | Interlock úplet | 1. - 2. vrstva

Elastický úplet ze 100 % merino vlny 16 mikronů je vhodný jako první nebo druhá vrstva. Pletení interlock zaručuje vysokou elasticitu výrobků při zachování výhod přírodní merino vlny. Vzduchové kanálky v úpletu zlepšují izolační vlastnost materiálu a zvyšují schopnost odvádění potu. Oblečení z 230 g interlock pleteniny se vyznačují vysokým komfortem a funkcí.

EN

- 1 Protection from perspiration**
An active transported layer increased production of sweat in the armpits from the skin. Unpleasant odors are reduced thanks to natural antibacterial merino wool during active sports.
- 2 Support of the abdominal muscles and hips**
the places of abdomen and hips have the compression function
- 3 Protection from the cold**
full single knitwear of wool ensures protection from the cold of the shoulders
- 4 Increased thermal protection together with ventilation in the spine**
combination of smooth and perforated surfaces protect from the cold and ventilate in areas of increased sweating
- 5 Increased thermal protection in the kidney area**
light reinforcement in the hips and kidneys protect from the cold
- 6 Minimum number of seams**
T-shirt is made by seamless technology - the minimum number of seams. Stitched only on the sleeves and collar

CZ

- 1 Ochrana před pocením**
zvýšenou tvorbu potu v podpaží transportuje od pokožky aktivní vrstva. Díky funkci přírodní, antibakterální merino vlny, se snižuje nepříjemný zápach při aktivním sportu
- 2 Podpora břišních svalů a boků**
oblast břicha a boků má podpůrnou kompresní funkci
- 3 Ochrana před chladem**
ochranu před chladem v ramenou zabezpečí plný jednolící úplet z vlněné příze
- 4 Zvýšená tepelná ochrana společně s odvětráním v oblasti páteře**
kombinace hladké a děrované plochy tvoří jak ochranu před chladem, tak odvětrávací plochu v místech zvýšeného pocení
- 5 Zvýšená tepelná ochrana zad v oblasti ledvin**
lehké zesílení v bocích a ledvinách Vás dostatečně chrání před chladem
- 6 Méně šitých švů**
triko je vyrobeno technologií seamless - minimální počet švů. Šité pouze na rukávech a límečku.

80% MERINO HEAVY SEAMLESS

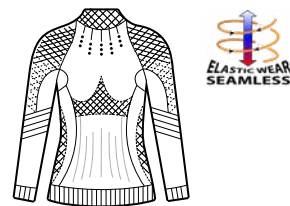

EN Seamless luxury woolen clothes will become your favorite. Reliably transports moisture away from the skin and natural 16-mi-cron merino ensures perfect thermal comfort. Highly elastic material allows for easy dressing. Perfectly adapted woolen yarn that definitely does not scratch while still encircling the body. Thanks to a unique processing it perfectly fits each figure.

CZ Bežešvé vlněné luxusní prádlo které si ihned obľíbíte. Spolehlivě odvádí pot od pokožky a přírodní 16-ti mikronové merino zabezpečí dokonalý tepelný komfort. Vysoce elastický materiál umožní snadné oblékání. Skvěle upravená vlněná příze, která zaručeně neškrábe a velmi lehce obepíná tělo. Díky unikátnímu zpracování perfektně sedí každé postavě.

LIGHT / 180 g

EN This is a very light seamless underwear designed to be used as a base layer on the body. Polypropylene micro fiber contains the permanent „**SILTEX**“ finish – silver ions inside the fibers, therefore it provides antibacterial protection. High thermal insulation is a result of the knitting of the short reverse loops on the inside of the fabric. These loops create an incredible number of air ducts, thanks to which the underwear has a high thermal insulation capability. The almost zero water absorption of polypropylene maximizes sweat transport away from the skin.

CZ Velmi lehké bezešvé prádlo určené jako základní, spodní vrstva na tělo. Polypropylenové mikrovláknó obsahuje nevypratelnou úpravou „**SILTEX**“ – ionty stříbra uvnitř vláken, díky tomu poskytuje prádlo antibakteriální ochranu. Vysoká tepelně izolační schopnost díky způsobu pletení krátkých rubních smyček na vnitřní straně úpletu. Tyto smyčky vytváří neuvěřitelné množství vzduchových kanálků, díky kterým má prádlo schopnost vysoké tepelné izolace. Téměř nulová nasákavost polypropylenu maximalizuje transport potu od pokožky.

16 MC SUPERSOFT - LESS DURABLE

Socks made of Merino wool with a fiber diameter of 18 - 22 microns is more pleasant than fabric made of ordinary wool.
Ponožky z Merino vlny o průměru vlákn 18 - 22 mikronů jsou příjemnější než z běžné vlny.

| **EN** IRM is running sock containing 29% **LENZING PROFILEN**, which offers the lowest coefficient of friction, is non-flammable, repels dirt and water, and is physiologically neutral. This sock is highly durable and protects the user from blisters. Zones exposed to high stress such as the bottom, the toe and the Achilles' heel area are reinforced with a double-layer material, which forms an impact-absorbing layer protecting the user from corns and calluses.

| **CZ** IRM běžecká ponožka, která obsahuje 29% **LENZING PROFILEN**, který má nejnižší koeficient tření, je nehořlavý, odpuzuje nečistoty a vodu, je fyziologicky neutrální. Tato ponožka je velice odolná a chrání uživatele před vznikem puchýřů. Nejvíce zatěžované zóny chodidla, špičky, Achillovy paty jsou zesílené dvojitou vrstvou materiálu, která tvoří tlumící vrstvu před otlaky.

| **EN Increased thermal protection together with ventilation** combination of smooth and perforated surfaces protect from the cold and ventilate in areas of increased sweating

| **CZ Zvýšená tepelná ochrana společně s odvětráním** kombinace hladké a děrované plochy tvoří jak ochranu před chladem, tak odvětrávací plochu v místech zvýšeného pocení

MERVIS INTER
50 % Lenzing FR® viscose / 50 % Merino wool

Flame retardant functional underwear is made of non-flammable Lenzing FR® viscose and fine merino wool. Lenzing FR® viscose can effectively protect against fire and merino wool transports moisture from the body to other layers of clothing. It keeps the body dry and comfortable. Natural non-flammable material sewn with meta-aramid yarns from Nomex® DuPont™ ensures maximum comfort with a high degree of fire protection. EN ISO 11612 – Protective clothing – Clothing to protect against heat and flame.
