# Brusletto knives

- always at your side.

## Tradition and quality since 1896.

**Brusletto & Co's** history goes right back to 1896 when Rognald Brusletto started as a knifemaker and a scythe maker at Geilo. Forging tools and knives was nothing new in Hallingdal. The history of mining for ore at Hardangervidda and manufacturing of sickles, scythes, axes, knives and swords around Geilo had already started 1500 years prior to when Rognald Brusletto started the company. Geilo had been a center for the forging of tools and knives for a long time already. It was thus a very long tradition that the craftsman and industrial pioneer Rognald Brusletto entered, when he further developed the use of a mechanical hammer based on water power, and at the same time he opened up the way to technical development and industrial production that would put its stamp on the industry and the local community at Geilo for many generations. Today **Brusletto & Co AS** manufacture high quality sportsknives. Our knives are an important tool whether you are hiking, fishing, hunting, biking or skiing, and the knives are designed and made to be used. The shape of the handle and the blade differs depending on the need you, the user, want to meet and not least what fits your hand best. We use different types of handle materials and different types of steel for the blades in our knives. See our website and our catalogue for details on the knives. The steels we use are high value steels which are stamped, heat treated and hardened to optimal hardness. A **Brusletto** knife will retain its sharpness for a long time and at the same time being relatively easy to resharpen when necessary.

All our knives are manufactured by hand and our knifemakers sort and select the material used for the knives and handcraft the knife. There are between 48-55 different handoperations to make one **Brusletto** knife. This ensures that no knives are identical, but all our knives are made to last and we grant a lifelong warranty against manufacturing faults for all Brusletto knives. This warranty does not cover normal wear and tear, reshaping, misuse, disassembly or lack of normal maintenance.

Our best selling and best known knife is the **Brusletto Hunter** and more than 1.3 million knives of this model has been manufactured and sold since this knife hit the market in 1961. We are proud of our knives and our basic idea is that a knife is a companion on a trip, a tool that will help you carry out tasks both small and big.

It will be at your side...always!  
Have a good trip!

A handwritten signature in black ink, appearing to read "Ken Ove Nyhus".

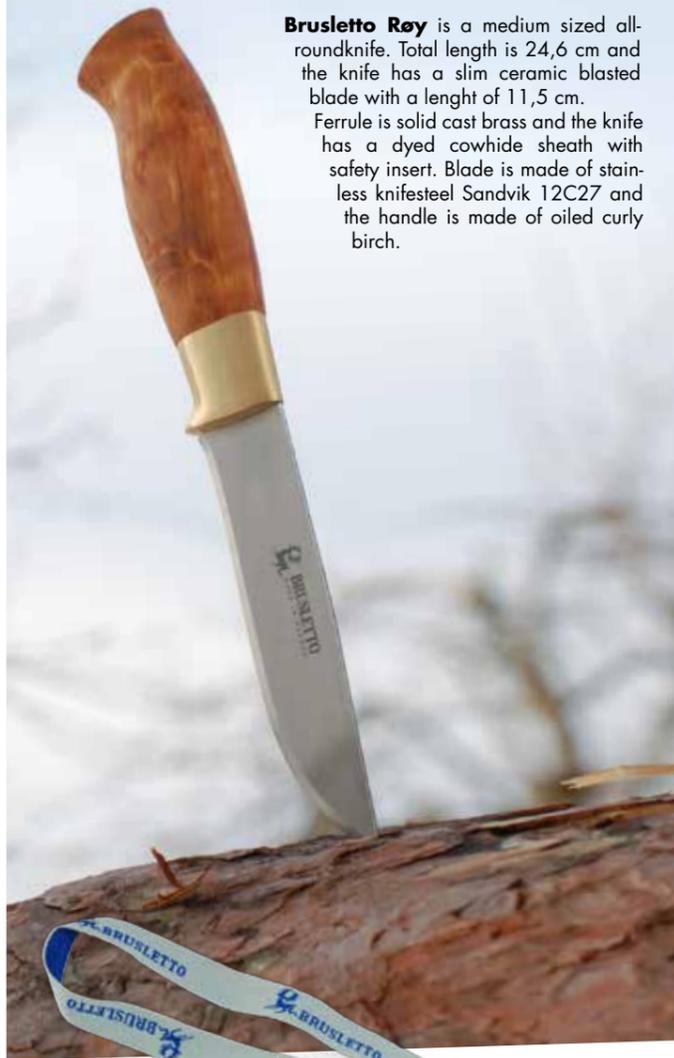

Ken Ove Nyhus  
CEO, Brusletto & Co AS

## Røy

**Brusletto Røy** is a medium sized all-roundknife. Total length is 24,6 cm and the knife has a slim ceramic blasted blade with a length of 11,5 cm.

Ferrule is solid cast brass and the knife has a dyed cowhide sheath with safety insert. Blade is made of stainless knifesteel Sandvik 12C27 and the handle is made of oiled curly birch.

## SEVR

**Brusletto SEVR** is a skeleton-knife with a profiled finger grip. The knife has a total length of 7,2 cm and the edged blade part is 6,5 cm. **Brusletto SEVR** is made of a special knifesteel VANAX 35 by Uddeholm. The knife is delivered with a multipurpose leather sheath. New steel, no compromise. **Brusletto SEVR** is the knife.

## Rondane

**Rondane** A full tang knife which is a combination of traditional and modern knifetechnologies. The knife has a spear-formed blade with serrated thumbgrip on the spine of the blade and has a compound bevel. Brusletto Rondane and is a multipurpose knife and comes in two versions, one with curly birch handle scales and one with micarta scales. The length of the knife is 23,6 cm and the blade length is 11,8 cm. The knife comes with a dyed cowhide sheath with edgeblock.

## Hunter

Norways most sold ever!

A slim convex grinded blade with a length of 13.5 cm. Aluminum finger guard. Dyed cowhide sheath with safety insert. More than 1.3 million knives sold. The all round knife par excellence!

## Hunter Premium

This is an exclusive version of Norway's most sold knife during all times. The Premium version has a grinded spine so you can use it on firesteel and save the blade's edge. The blade is ceramic blasted to a silksoft finish and the handle is specially treated to enlighten the vivid pattern in the curly birch. The **Brusletto Hunter Premium** is delivered in an exclusive giftbox including a diamond sharpener from EZE-Lap.

## Storbukken

A large, smart knife for everyday use, of a weight and size that makes the knife a good all rounder. The blade measures 15.1 cm. High-quality leather sheath, with a safety insert, of course.

## Bamsen

A powerful knife of good weight. Blade length is 12.5 cm. Aluminum guard and pommel. Dyed cowhide sheath with safety insert.

## Tiur

Best in test!

Outdoormagazine UTE nr. 3-2008.

A medium-sized all-round knife with a slim blade. The handle is of walnut root. Stainless knife steel, and blade length is 12 cm. Aluminum finger guard and dyed cowhide sheath with safety insert. A very suitable allroundknife.

## Tool

In our pursuit of joy and challenge's we know that you need a knife when you go biking, hiking, kiting, telemarking or just spend time outdoors - but you might also need a few tools. We make knives because they matter to us, and we have constantly challenged knifedesign and developed new knives since 1896. Brusletto Tool is a light-weight knife which also triples as a wrench and a screwdriver. The skeleton blade has a serration for better thumb-grip and handling, profiled handle area, 10, 12 and 14 mm boxwrenches, screwdriver and in addition a bottle opener. The blade has four holes so you can attach it to a lance. The Brusletto Tool comes with a black leather sheath, the knife is 18,3 cm long and the blade length is 6,5 cm. Buy one! Or buy ten and give them to your friends!

## Femund

Brusletto Femund is a powerful full tang hunting knife with a drop point blade with Scandinavian grind. The knife is well balanced and has a finger guard for safety. This is a knife for the outdoorsmen and -women who want a knife which can be used during the harshest conditions. The knife comes with a solid black dyed cowhide sheath with edgeblock and safetyloop. The knife length is 23,5 cm and the blade length is 11,5 cm.

## Framtid

**Brusletto Framtid** has a partially serrated blade and Thermoflex handle with finger grip. 9 cm ceramic blasted stainless steel blade. Black sheath with safety insert. This is one of five knives in the Millennium Series and the knife is an excellent working knife for all tasks.

## Vassfaret

**Brusletto Vassfaret** is a new fulltang bushcraft knife which is named after one of the most mythical forest areas in Norway. The knife has a short but wide blade with a spear-point shape and a Scandinavian grind. The blade is made of stainless 440C with a length of 9 cm, and the handle is made of Norwegian birch. The overall length of **Brusletto Vassfaret** is 20,8 cm and it is delivered with a high-quality brown leather sheath. The lanyard hole and the pins are in aluminum.

## Vassfaret Signaturversjon

**Brusletto Vassfaret Signaturversjon** is a fulltang bushcraft knife in two limited editions. One with silk soft finish with white and red micarta handle and one in mirror polished finish with black and red micarta handle. Brusletto Vassfaret Signaturversjon is 20,8 cm long with a blade length of 9 cm. The blade is made of stainless 440C steel and is marked with the designer's signature on the blade.

## Norgeskniven

An excellent all round knife. Blade length is 9.5 cm and the knife has a German silver ferrule. Dyed cowhide sheath with safety insert. The knife can be locked into the sheath. This is a slender knife for most tasks.

## Trillemarka

**Brusletto Trillemarka** is named after a beautiful Norwegian national park and is a new fulltang hunting knife with a trailing point narrow blade. The knife's blade is 10,6 cm long and the overall length is 21,9 cm. The bolster, pins and lanyard hole are all in stainless steel. The handle is made of polished micarta and the Brusletto Trillemarka is delivered with a high-quality brown leather sheath with pushbutton to secure the knife.

## Spikkekniv

Specially designed and constructed for carving wood. 2,500 teachers and more than 150,000 pupils have tested this knife on courses and during activities. The handle suits both adults and children. The knife has a 6.2 cm long carbon steel blade.

# Villguten

New  
2015!

## Villguten

**Brusletto Villguten** The Brusletto Villguten is by popular demand a smaller version of our knife Villmann. The knife has a blade with Scandinavian grind and the blade is made of stainless steel 440C, thickness 3 mm. The overall length of the knife is 29,2 cm and the blade length is 16 cm. This knife comes with the coffee-kettle-halfmoon incorporated in the blades spine. The Brusletto Villguten has our newly upgraded designed leather sheath which is ambidextrous. The solid brass ferrule gives the traditional handle added strength. The Brusletto Villguten is an allroundknife and is a perfect choice for the outdoorspeople who want a smaller knife, than the Villmann, for the rugged outdoors.

## Villmann Spesialversjon

**Brusletto Villmann Spesialversjon** is a limited fulltang version of the Villmann. The knife is our biggest knife ever and is a knife for the real outdoors, for hunters, fishermen and the dedicated outdoorsmen – and women. The Brusletto Villmann Spesialversjon has a blade with Scandinavian grind and can be used as a replacement for an axe. The blade is made of stainless 440C knifesteel and the length of the blade is 22,5 cm. The overall length of the knife is 36

cm. The handle is made of olive wood and the sheath is a high-quality black leather sheath with pushbutton to secure the knife. A new batch of knives with cocobolo wood in the handle and bolster, pins and lanyard hole in stainless steel is under production and will be available in a limited batch of 100 knives from the end of January 2015.

## Nansen

Stained and oiled curly birch handle and the ferrule is made of German silver. The blade length is 9.5 cm and the knife is delivered with a dyed cowhide sheath with safety insert. This is a copy of Fridtjof Nansen's knife he obtained from Eskimos in Greenland.

## Speiderkniv

A safe and good Scout knife with a aluminum fingerguard. The blade length is 9 cm. Dyed cowhide sheath with safety insert.

## Villmann

**Brusletto Villmann** is our biggest knife ever. It has a blade with Scandinavian grind. The blade is stainless Sandvik12C27 and the length is 22,5 cm. The overall length of the knife is 36 cm. The solid brass ferrule gives the traditional handle the extra strength needed when the knife is used as a replacement for an axe. Handle made of Norwegian birch.

## Falken

An excellent hunting knife with a convex grinded blade and the blade length is 8 cm. The knife has a cast aluminum ferrule and comes with a dyed cowhide sheath with safety insert.

## Speider med butt tupp

A small knife with finger guard and blunt tip for the smallest children. The blade length is 9 cm, the ferrule made of steel and the sheath is made of dyed cowhide.

## Bruslettokniven

A knife for everyday use with handle made of norwegian birch. The blade is 9,3 cm in length and made of stainless knife steel. The ferrule is made of German silver and the knife is delivered with a sheath made of dyed cowhide with a safety insert.

## Rypa

A small knife for small jobs. Especially, perhaps, for hunting small game but also for those of you who like a small knife with a good grip. The blade is convex ground and measures 6.5 cm in length. The handle is slightly colored by staining.

## Hallingskarvet

In 2008 Norwegian prime minister Jens Stoltenberg officially opened Norway's newest national park. We have made a small traditional knife named after the national park. The blade length is 7.3 cm and the knife has ferrule made from German silver and a sheath made of dyed cowhide with a safety insert.

## Sprettern

Norwegian hunting and fishing magazine: Jakt og fiske no. 4/05

Test winner with a Thermoflex handle. The blade length is 12.5 cm from handle to tip. Brown cowhide sheath without a safety insert. This opening knife for large game has its cutting edge on the upper side of the blade and is also very good for gutting fish. The knife has a tremendously good grip even when the handle is wet.

## Skinner

Norwegian hunting and fishing magazine: Jakt og fiske no. 4/05

Skinningknife with Thermoflex handle which gives an excellent grip even when wet. The knife blade is a copy of a four hundred year old skinning blade from Hallingdal and is 2.8 cm wide at its broadest point. The blade length is 10.5 cm and the knife has a brown cowhide sheath which is constructed without safety insert.

## Fjord

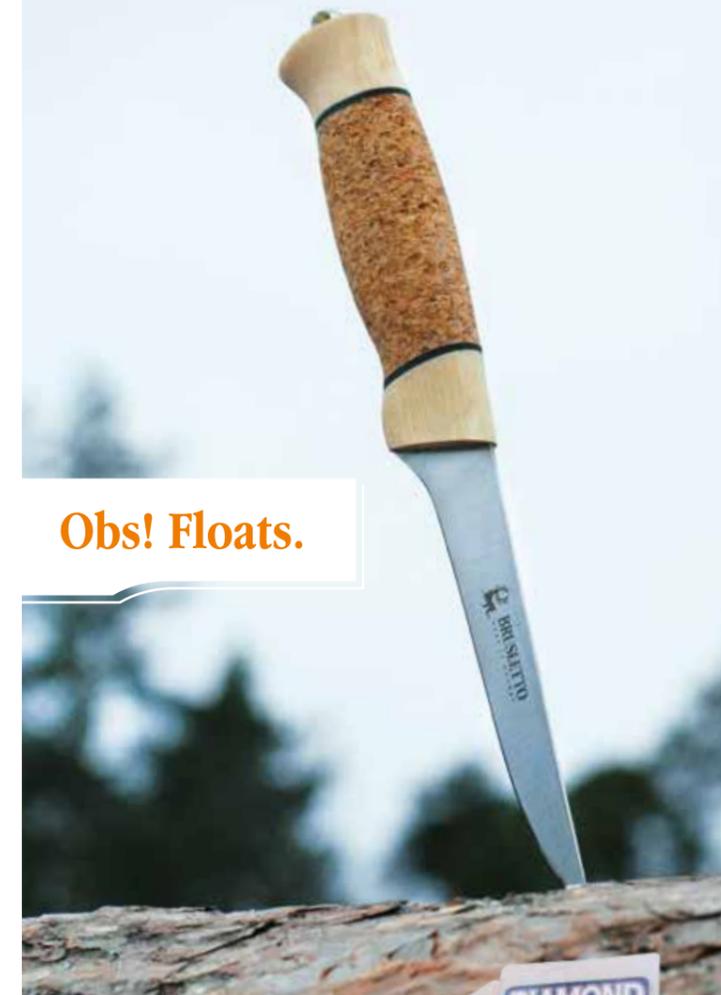

**Fjord** is a knife from Brusletto aimed at the leisure boating market. It has a mahogany handle with laseretched patterns. The knife has a brown cowhide sheath with safety insert and the blade length is 7.5 cm. Total length of the **Brusletto Fjord** is 19.5 cm.

## Fiskern

Handle made of cork and birch. This ensures that the knife will float if you should lose it in the water. The blade length is 12.5 cm. This is a specially made knife to gut fish. The knife has a dyed cowhide sheath with safety insert.

Obs! Floats.

## Diamantbryner

**M** is 3-1/4" x 1/4" Diamond Round Shaft. Stores in Brass handle. Leather pouch with belt loop.

**S** is a 2-1/4" Diamond D shaped shaft with groove for fishhooks. Opens to 5-7/16". Stores in pen type cap.

**36F og 36M** is a 1" x 4" Diamond Stone with a Leather Pouch with groove for fishhooks. Fine grit or Medium grit.

## DMD-KIT

is a knife Sharpening Kit which includes knife clamp, angle guides, guide rods, roll pouch and a Superfine, Fine and Medium Diamond sharpening stone.

## Knivsliper

**Brusletto knivsliper** is small, lightweight and easy to use. The sharpener has tungsten carbide at one side and ceramic for honing on the other side. It can be used on all types of knives as long as the blade is made of metal and without serrated edge. **Brusletto knivsliper** has rubber feets for increased stability.

LARS MONSEN

Alt Lars Monsen har lært har han lært på den harde måten. Der ute, i villmarka, gjennom mer enn 4000 døgn i sovepose. Gjennom alle årstider, måneder og år i strekk, i ekstrem hete og ekstrem kulde, kort sagt under alle slags forhold. Et liv som er dønn ekte, med så sterke opplevelser at ord umulig kan beskrive dem godt nok. Det handler om å tørre å gå etter drømmen, gi blaffen i alle som dømmes deg nord og ned, og heller stole på deg selv. Det handler om holdninger. Om å tenke de rette tankene. Det handler om å sette seg høye mål, og ha guts og vilje til å nå dem.

Da kan fasiten bli blant annet Norge på langs, Alaska på langs, Canada på tvers, 365 dager på Nordkalotten, 90 dager på loffen i Børgefjell, en sommer i Femundsmarka, Kodiak Island på langs, Katmai på langs, Admiralty Island på langs...

Du kan gjøre det samme. Valget er ditt. God tur!

“Da jeg selv skulle teste og utvikle kniver var det helt naturlig å velge Brusletto som samarbeidspartner. Etter mange års bruk kjenner jeg Brusletto-kvaliteten som den beste på markedet.”  
Nå har vi skapt de aller første Lars Monsen-knivene.

LARS MONSEN

## ANÁRJOHKA

Anárjohka. Nasjonalpark i indre Finnmark, elv, samisk reindriftsområde, uframkommelig villmark.

Da jeg skulle sette navn på den største og råeste samekniven jeg noensinne har brukt måtte det bli Anárjohka. For meg oses navnet av friluftsliv og opplevelser, en hverdag med bålryk i nesa og fiskeblod under neglene, svettende en varm sommerdag i kano omgitt av tusenvis av surrende mygg, eller krøpet sammen i en tjukk sovepose i et telt i den beinalde mørketida.

Anárjohka, den største samekniven, har alt jeg vil den skal ha. En rustfri egg som holder seg sylskarp lenge – også etter at du har slipt den på ny. Et skaft som gjør at den ligger godt i hånda, uten at du blir unødig sliten i neven under bruk. Tyngde til effektivt å hugge bjørkeveden eller vadestaven. Festemuligheter for reimer eller snorer. Et hakk til å løfte kaffekjelen av bålet. Skrape for blodranda i fisken. Kvalitet og funksjonalitet.

LARS MONSEN

## BØRGEFJELL

Børgefjell. Nasjonalpark i de indre delene av Nordland og Nord-Trøndelag. Utilgjengelig, værhard villmark. Samisk reindriftsområde.

Da jeg skulle sette navn på den råeste samekniven jeg noensinne har brukt måtte det bli Børgefjell. For meg oses navnet av storøret og friluftsliv, en hverdag med bålryk i nesa og fiskeblod under neglene, svettende med tung ryggsekk gjennom steinura en varm sommerdag, eller sammenkrøpet over et fiskehull i isen en bitende kald februardag.

Børgefjell, den nest største samekniven, har alt jeg vil den skal ha. En rustfri egg som holder seg sylskarp lenge – også etter at du har slipt den på ny. Et skaft som gjør at den ligger godt i hånda, uten at du blir unødig sliten i neven under bruk. Tyngde til effektivt å hugge bjørkeveden eller vadestaven. Festemuligheter for reimer eller snorer. Et hakk til å løfte kaffekjelen av bålet. Skrape for blodranda i fisken.

LARS MONSEN

## FEMUNDSMARKA

Femundsmarka. Nasjonalpark i indre Hedmark og Sør-Trøndelag. Ville vassdrag, trolske furuller og idylliske vann som perler på en snor. Samisk reindriftsområde.

Da jeg skulle sette navn på den råeste allround-kniven jeg noensinne har brukt måtte det bli Femundsmarka. For meg oses navnet av friluftsliv og opplevelser, en hverdag med kanopadling, bæringer, bålryk og fiskeblod. Her inne har jeg vært mange ganger til alle årstider, midtsommers når trafikken er stor, men også vinterstid når skogene ligger øde. Jeg vender alltid tilbake.

Femundsmarka, den optimale brukskniven, har alt jeg vil den skal ha. En rustfri egg som holder seg sylskarp lenge – også etter at du har slipt den på ny. Et skaft som gjør at den ligger godt i hånda, uten at du blir unødig sliten i neven under bruk. Et bredt bruksområde; sløyting, flåing, spikking. Festemulighet for snorer. Skrape for blodranda i fisken.

# Something to trust

When you are outdoors a reliable quality knife is an important part of a safe and positive experience.  
Enjoy nature with a knife from **Brusletto** at your side.
